HOW TO GET **Education Benefits** LICENSING ON GITHUB

To get access to GitHub Education benefits, you usually need to verify that you are a student, teacher, or school administrator. GitHub asks for proof of enrollment or teaching status so it can confirm that you qualify for the program. Once your application is approved, you can use the benefits included in the Education Pack, such as developer tools, learning resources, and other student-focused offers.

The process is handled through GitHub Education, where you submit your school information and any required documents. If your verification is successful, GitHub grants access to the benefits on your account. This can help you learn faster, build projects more easily, and take advantage of resources that support education and software development.

If you are referring to a specific license, product, or feature on GitHub, the exact steps may depend on what you want to activate. In general, though, the key requirement is to prove your education status and complete GitHub's verification process

STEPS

- Open GitHub: https://github.com
- Create a new free account.
- Enter your email, password, username, and country/region.
- Go to **Settings** and open **Billing and licensing**.
- Open **GitHub Education Benefits** to access free developer resources.
- Start a new application.
- Select your role in education: **Student** or **Teacher**.
- Search and select your school/university.
- In "What is the name of your school?", enter your university name.
- Enter your university email address.
- Go to the option to enable **2FA** (two-factor authentication) for account security.
- Select the type of proof you want to provide.
- Choose the first option: **Dated school ID**.
- Enter your university address for ID location details.
- Submit your application.
- Check your email and complete all verification steps

Important Notes

- Use real and accurate school information.
- Make sure your document is clear and valid before uploading.
- Keep 2FA enabled to protect your account.
- Approval may take some time depending on verification volume.
